SKILLS

React, React Hooks, NodeJS, ExpressJS, React Native, MongoDB, Laravel, PHP, MySQL, JavaScript, HTML, CSS, Heroku, Hostinger, Git, GitHub, Bootstrap, Tailwind

PROJECTS

RoninScooterPH [roninph.club]
Solo Project [HTML/CSS, Bootstrap, Laravel, React, JavaScript, MySQL, PHP]

> Developed an administration page for managing items and orders. This may be accessed via roninph.club/admin/login. On the Store application, I built a login/registration system for administrators and customers, as well as an add-to-cart functionality and checkout, and I utilized Laravel to transport data.

Ronin Scooter PH Landing Page [roninphdb.club]
Solo Project [HTML/CSS, Bootstrap, Laravel, React]

> Using React and Tailwind, I designed a completely responsive landing page for Ronin Scooter PH.

7seven Luxury Hotel [https://7seven-luxury-hotel.netlify.app/]
Group Project [HTML/CSS, Bootstrap, React]

> I improved my React abilities using Bootstrap, and I was able to refactor components and improve their routes.

You may learn more about my online projects, GitHub account, and other Social Media accounts by visiting my [portfolio page](#).

EDUCATION

KodeGo [May 2022 - August 2022] - *Full Stack Web Development Certification*

The KodeGo Full-Stack Web Development Certificate is issued upon completion of projects. Here is the list of projects that I've made to earn the full stack developer certification:

- **RoninScooterPH** [roninph.club]
- **7seven Luxury Hotel** [https://7seven-luxury-hotel.netlify.app/]

Laguna University [2010- 2015] - *Bachelor of Science in Computer Science*

One of the developers of the thesis project 'LaCuisInA: Laguna Cuisines in Android' android application and website. Bootstrap was utilized for web design, and Eclipse was used for Android programming.

One of the Programming Group Interns from 2012-2013 who designed and managed the Department of Computer Science Website at Laguna University using WordPress.
